ABOUT THE SCIENCE FACULTY

The Science Faculty is comprised of eight Science Teachers plus one Technician. The Faculty is continually looking to develop wherever possible and continuing professional development (CPD) is an integral part of moving forward together.

The Faculty has five well equipped laboratories including a Sixth Form laboratory, one newly refurbished STEM room and one preparation room. We have recently expanded the Faculty to include Engineering which is currently taught at KS4.

We are extremely proud of offering a comprehensive extra-curricular offer throughout the year and continue to invest in STEM projects. Recent achievements include winning the Land Rover 4x4 North West Final (January 2020) as well as building and trialling our school made electric race car.

The courses currently followed at KS4 are AQA Combined Science, separate Sciences and BTEC Tech Award in Engineering. The Faculty offers a range of courses at KS5 including OCR A-Level Biology, Chemistry and Physics as well as Level 3 BTEC Applied Science. The Sixth Form boasts an exceptional environment for pupils in Science with a newly built laboratory.

The Faculty is one which is continually growing in confidence and will provide an ideal opportunity to anyone wishing to make a positive impact on our pupils; we believe all pupils are destined for greatness and that is at the centre of all we do.

Staff are encouraged to take a proactive role in their own professional development; opportunities to lead initiatives, both within the Faculty and across the school, are regularly available.
